PERFORMANCE LIGHTING

powered by

2023 marks another important milestone on our path, with PERFORMANCE iN LIGHTING joining the GEWISS group, a point of reference in the international market for home & building automation solutions and services, energy protection and distribution, electrical mobility, and smart lighting.

This new project will allow us to further expand reciprocal skills, confirming the path of growth begun by PERFORMANCE iN LIGHTING in 2017 when all the products, PRISMA, SBP, and SPITTLER, were brought together under a single brand, which has now become **PERFORMANCE iN LIGHTING | powered by GEWISS**.

This decision confirms our desire to constantly take on new challenges, offering innovative, technological, and reliable solutions in order to always meet the needs of our clients in an increasingly more complete way. Our history is forged on the determination to accept no compromise. In fact, PERFORMANCE iN LIGHTING products have always combined reliability with aesthetics and pleasing design with performance, characterising the history of technical lighting. Our path now confirms, even more vigorously, our perpetual enthusiasm for innovation which has led the group to become a solid global point of reference in the world of design and architecture. We trust that your faith in us remains unwavering, as it is a source of constant motivation that projects us towards the new challenges the world demands of us.

EVERGREEN

For more than 40 years our mission has been to design and produce long lasting lighting products, with timeless design and made of materials that maximize recyclability.

We guarantee the continuity of our products over the years with the continuous availability of spare parts. This has allowed us to extend the life cycle of our products from manufacturing to the end of their life, thus reducing waste released into the environment. We are firmly opposed to the phenomenon of planned obsolescence. Preferably, and whenever possible, we use completely recyclable raw materials such as glass, aluminium and high quality technologies.

Each product has a life cycle in our catalogue as well; in this edition many new products are added and some fixtures or some product versions are removed despite being still current and available on request.

These are products that we have named EVERGREEN and for which we want to create a new showcase on our site where you will find with single codes at very advantageous prices.

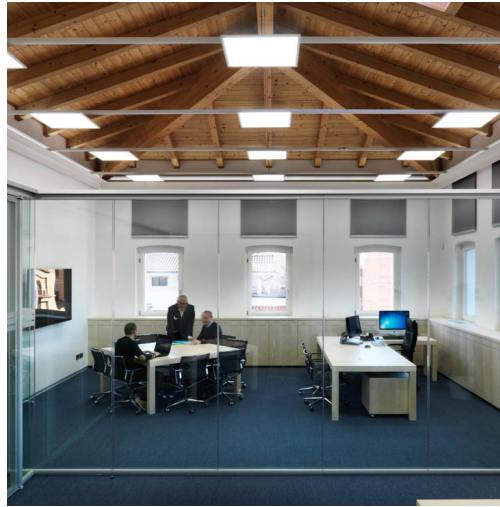

These products ensure you always find the design solution you are looking for, at the best price for the customer who is not looking for novelty, but who focuses on the economy, convenience and durability of products.

This is another way to help the environment together.
